

# Configuración Servlets en Eclipse

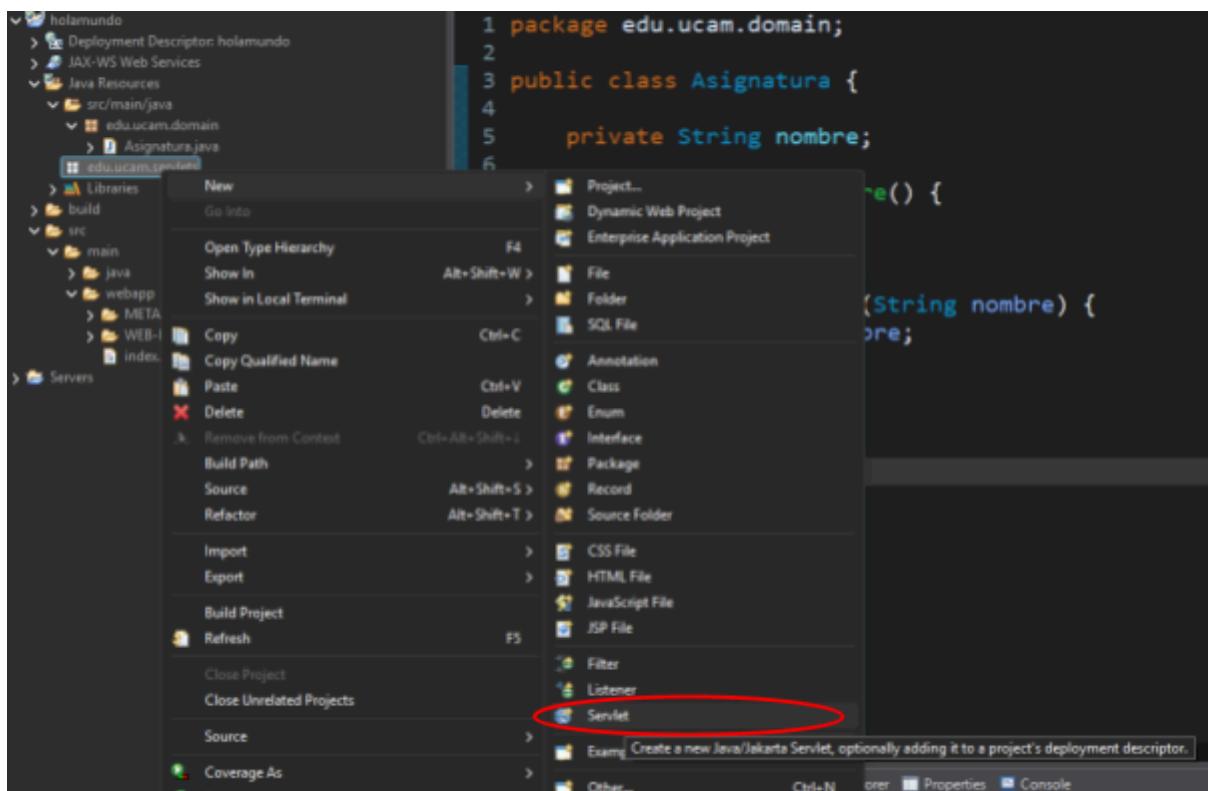

EnriqueBDL

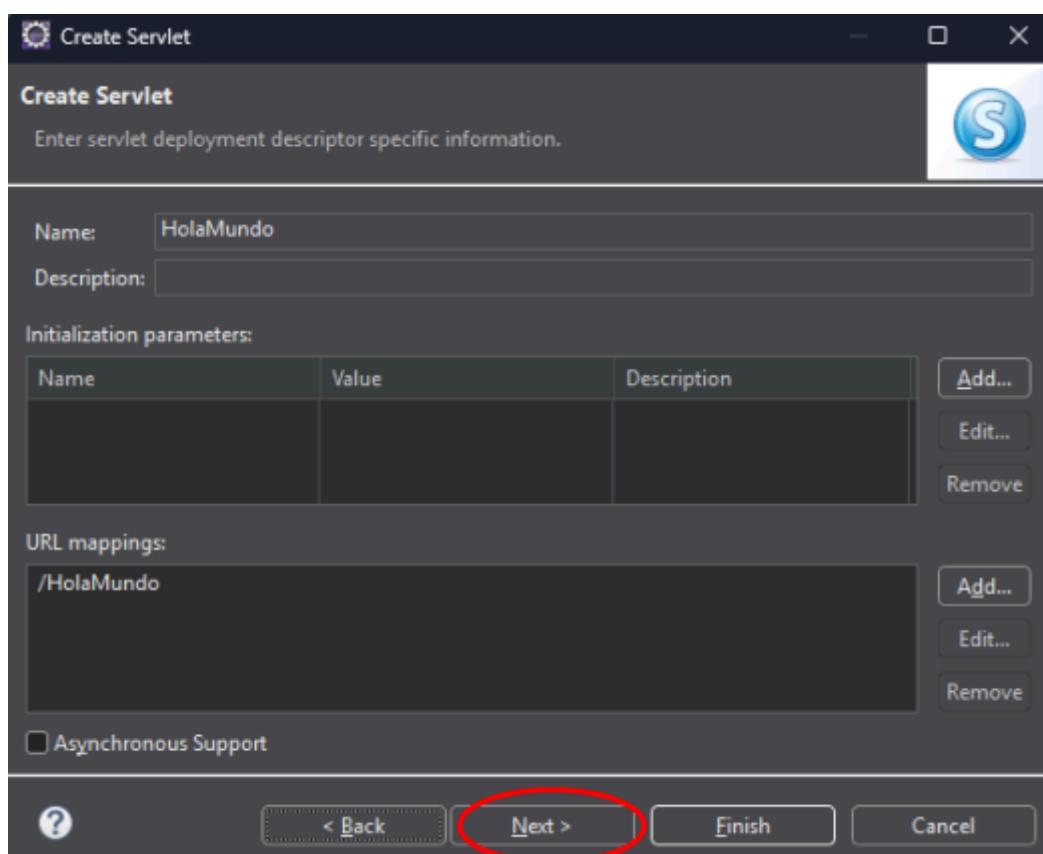

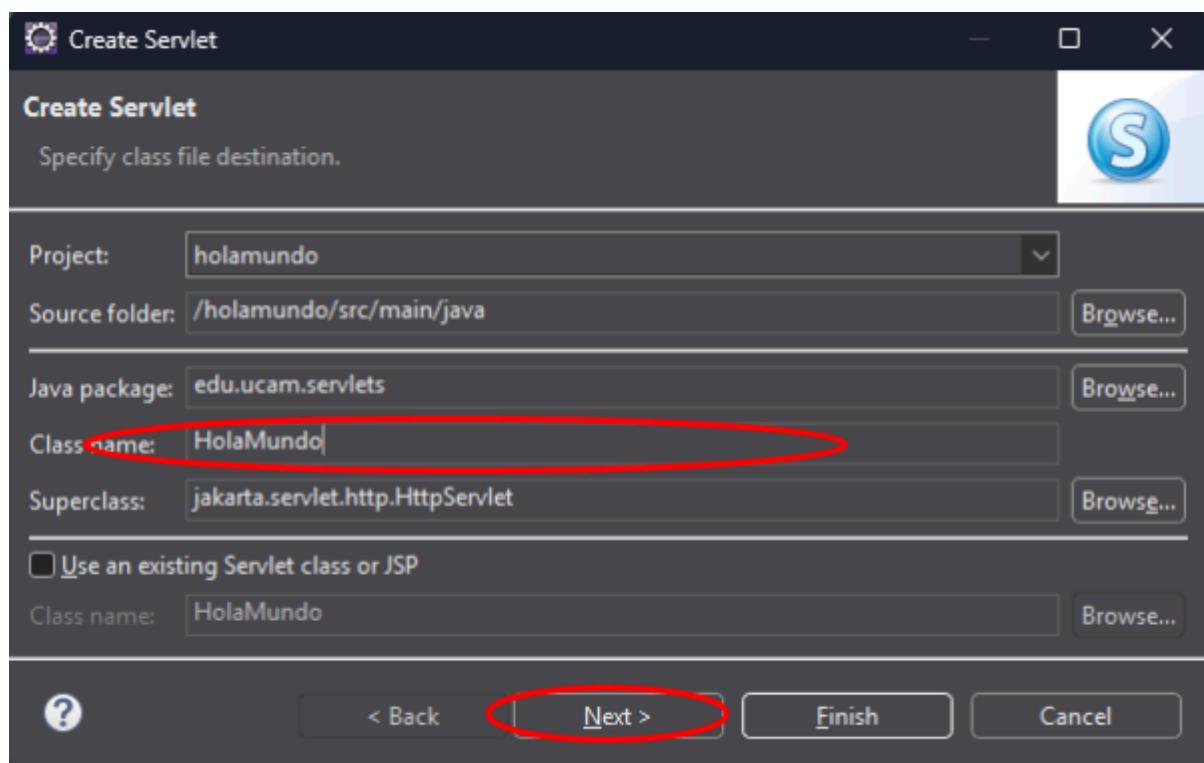

## Versión de Eclipse:

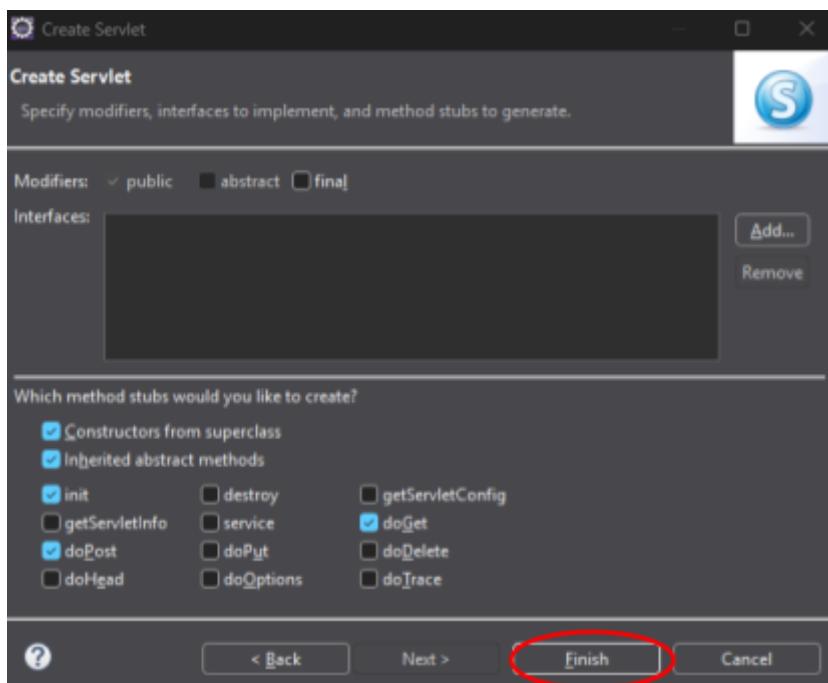

<https://www.eclipse.org/downloads/packages/#:~:text=Eclipse%20IDE%20for%20Enterprise%20Java%20and%20Web%20Developers>

Página para descargar Tomcat: <https://tomcat.apache.org/download-11.cgi>

## Pasos:

Marca lo que quieras usar.

```

1 package edu.ucam.servlets;
2
3 import jakarta.servlet.ServletConfig;
4
5 /**
6  * Servlet implementation class HolaMundo
7  */
8 @WebServlet("/HolaMundo")
9 public class HolaMundo extends HttpServlet {
10     private static final long serialVersionUID = 1L;
11
12     /**
13      * @see HttpServlet#HttpServlet()
14     */
15     public HolaMundo() {
16         super();
17         // TODO Auto-generated constructor stub
18     }
19
20     /**
21      * @see HttpServlet#init(ServletConfig)
22     */
23     public void init(ServletConfig config) throws ServletException {
24         // TODO Auto-generated method stub
25     }
26
27 }
28
29
30
31
32

```
